MCG Transtream Automates Shipping, Controls Costs, & Ensures On-time Delivery.

Whether you process 5 or 500,000 shipments per day, Transtream can help you streamline transportation processes across your entire enterprise.

That's why thousands of retailers, manufacturers, distributors, and financial service companies worldwide trust Transtream to deliver innovative multi-carrier management solutions across their enterprises and beyond.

One Platform, Scalable for any Shipper

Whether deployed on premise on a workstation or server, or accessed from the Cloud, browser-based Transtream apps automate shipping processes on your e-commerce site, warehouse, and back office.

Transtream is built to grow as your business grows.

5/day

500/day

500,000/day

Flexible and Versatile

Our drag and drop Composer tools enable you to adapt our best-in-class Transtream apps to meet the needs of users throughout your organization, map data to and from disparate data sources, and then change as your needs change.

KEY FEATURES

Multi-carrier Parcel Processing

Transtream automates weighing, rating, address validation, labelling, shipping, and tracking for FedEx, UPS, USPS and hundreds of other parcel carrier services, globally.

Smart Routing

Automatically select the best carrier service based on delivery area, weight, time, date, and other business rules and requirements.

Regulatory Compliance

Control compliance with Transtream's cross border and hazardous material processing capabilities. Automate form printing and regulatory reporting.

Cross-browser and Mobile

Transtream apps will run with any popular browser from a PC, Mac, or mobile device. Apps integrate with local data and peripheral devices, such as scales and thermal label printers.

On-premise or Cloud

Transtream is the only multi-carrier management solution that can be installed on workstation, server, or accessed from our SaaS environment.

Widget Plug-ins

Embed Transtream "Widgets" within your web pages or shopping cart, in minutes not months. Or use our powerful Black Box API for backend connectivity.

Transtream Provides Visibility and Control, From Purchase to Payment

Warehouses

Performance and reliability. Transtream powers some of the largest shipping operations in the world. Just scan, weigh, print, go.

Stores

Delight your customers. Transtream simplifies shipping for faster, cheaper delivery from any of your stores, globally

eCommerce

Just plug and play. Upgrade your website with production-ready shipping and returns Widgets, in minutes, not months.

Offices

Convenience and cost control. Transtream apps make it easy for your employees to ship, whether they are on site, or on the road.

Customer Service

Simplify tracking and returns. Transtream helps create loyal customers with powerful post-purchase solutions.

Information Management

High security, low maintenance. Use Transtream's API to enhance your legacy apps with powerful rating, shipping, and tracking capabilities.

Run Transtream Apps from any PC, Mac or Mobile browser and simplify shipping

1. Scan or enter order# and Transtream accesses order header and line item detail from host system (OMS, ERP, WMS, database, SaaS, etc.)

2. Tab to see ship to, ship from, bill to, alternate, and other addresses. Or access from address book.

3. Validate address and determine residential, commercial, or rural status.

4. Access line item detail to track package contents, or automate international and hazmat shipment processing.

5. Access carrier service from order or route based on business rules.

6. Support for other shipping modes, including international, returns, and freight.

7. Read weight from scale and easily add packages to multi-package shipments (1 of 3, 2 of 3, etc.)

8. Look up package dimensions.

9. Select Ship and print carrier label, update host system with track# and shipping charges, and send email alert.
